Profile

As a Senior Frontend React Developer, I help companies build high-performance, scalable, and user-centric web applications.

With over 8 years of experience, I have worked in diverse contexts: fintech, B2B SaaS, digital consulting, and tools for content creators.

My specialty: designing robust and efficient frontend architectures tailored to business needs.

Core Skills

⚡ Technical Leadership & Governance

- Led frontend architecture migrations
- Mentored team members (code reviews, pair programming)
- Defined and enforced frontend best practices
- Authored AI-assistant guidelines (Cursor, etc.)

🎯 Design Systems

- Designed shared and reusable component libraries
- Managed design tokens (themes, typography, colors)
- Integrated modern UI kits (Shadcn UI, Style Dictionary)

🚀 DX & Performance

- Load optimization (code splitting, lazy loading)
- Advanced caching and query management (GraphQL, React Query, Vue Query)
- Modular frontend architecture design (Turborepo)
- Built robust end-to-end tests (Cypress, Playwright)
- Continuous improvement of developer experience (tooling, Vercel, CI/CD)

Areas of Expertise

- Frontend Architecture: modular structures, monorepos, scalable organization
- Design Systems: design tokens, shared libraries, theming
- Performance & Optimization: lazy loading, profiling, cache management
- User Experience: type-safe forms, accessibility, E2E testing
- Real-Time & APIs: WebSockets (Socket.io), Supabase, Firebase, REST APIs
- Automation & AI: CI/CD, AI assistant integration, enhanced dev tools
- Consulting & Best Practices: code audits, documentation, mentoring, architecture

Professional Experience

Career Break — Travel in Japan (Mar 2025 – Jun 2025)

- Personal travel & cultural exploration in Japan
- Logistical planning and remote side-project preparation

Tudigo — Senior Frontend Developer (Feb 2024 – Feb 2025)

- Tech lead on a modern React application (TypeScript, Zustand, Tailwind)
- Built robust forms with React Hook Form & Zod
- Integrated and structured the design system via Shadcn UI
- Developed complex views and business features
- Managed updates, migrations, and code reviews

Jellysmack — Frontend Developer > Senior Frontend Developer (Aug 2021 – May 2024)

- Developed Vue.js products for content creators
- Cross-squad collaboration, media API integration, animations & UI
- Designed React applications (video, advertising, marketing)
- Initiated company-wide Vue-to-React migration
- Adopted React Query for efficient client-side caching
- Built a Tailwind-based design system as a plugin
- Monorepo architecture with Turborepo, GraphQL implementation
- Targeted testing (Cypress), code reviews, mentoring, technical decision-making

Yousign — Front-End Developer (Jul 2019 – Aug 2021)

- Developed features for an electronic signature application
- Built dynamic interfaces, implemented Jest / Testing Library / Cypress tests
- Frontend optimization (rendering, lazy loading)

Ekino — Junior Front-End Developer (Sep 2016 – Jul 2019)

- Developed interfaces with AngularJS, Angular 2+, and React
- Built hybrid mobile apps (Cordova, Ionic, React Native)
- Responsive UI, unit testing (Jasmine, Karma, Jest)

Ongoing Side Projects

Instantané Impro

Web app for improvisational theatre: audience uploads photos at the start of a performance, which are projected on stage to inspire actors. Supabase backend, admin interface, live upload management.

<https://instantane-impro-app.vercel.app/>

Orguin – Qui fait quoi ?

Event management platform for associations, troupes, or small organizations. Centralizes project, role, and registration management with public and private pages. Uses Supabase, React, and a permissions system.

<https://orguin.com/>

NPC Generator

Tool for generating non-player characters for role-playing games: name, appearance, traits, and backstory generated via AI. Used for both improvised and prepared RPG sessions.

<https://pnj.jdr.coffee/>

Combien ça coûte ?

Database of 300+ medieval-fantasy-themed objects. Searchable by category, rarity, or usage. Data maintained via Notion proxy. Minimal, fast GM tool.

<https://combien.jdr.coffee/>

Bots Discord

Collection of automation bots for Discord: role management, mini-games, community tools, animation, and moderation. Deployed on servers with over 8,000 users. Built with Node.js, Supabase, Socket.io, and Discord.js.

Formation

ESTEI Bordeaux — Master's Degree in Web Project Management (2014 – 2016)

Frontend development, project management, UX, digital production tools

IUT Michel de Montaigne — DUT SRC (2012 – 2014)

Digital communication, web development, audiovisual & multimedia

CAP & BEP AMACG (2010 – 2012)

Artisanal trades in graphic communication, design, advertising, marketing

Interests

Role-playing games (game mastering & world-building), improvisational theatre, drawing and illustration, video games, sports and outdoor activities
